

YIELDCORE AI – PRODUCTION AUDIT MODE

YieldCore is entering Production Audit Mode.

No new features.

Perform a complete platform-wide audit.

Audit every module:

- Dashboard
- AI Advisor
- Farm Health
- Weather
- NDVI
- Irrigation
- Nutrients
- Solar
- Carbon Credits
- Revenue Uplift
- Yield Projection
- Bio Inputs
- Pest Detection
- Pricing & SAFEX
- Alerts

Verify:

1. Data Integrity

- Values match across all modules
- No duplicate calculations
- No stale state
- No KPI drift

2. User Experience

- No dead buttons
- No broken navigation
- No overlapping UI
- Responsive on mobile and desktop

3. Visual Consistency

- Card spacing
- Typography
- Color system
- Icons
- Button styling

4. Performance

- No unnecessary re-renders
- No memory leaks
- No interval leaks
- No console warnings
- No network failures

5. Production Readiness

- Every module loads successfully
- Every route works
- Every action completes
- Every dashboard metric has a source

Generate a final report:

- Issues found
- Issues fixed
- Remaining issues
- Production readiness score /100
- Investor demo readiness score /100
- Commercial launch readiness score /100

Rule:

Only after the audit reaches 95+/100 should development proceed to AI Decision Center enhancements and advanced reporting.
